LNG as a driving force for cross-border
cooperation within Europe

Düsseldorf, Germany, 21st of May 2019

LNG
ROADMAP

6th LNG as a driving force for
cross-border cooperation
within Europe

6th WORKSHOP IN DÜSSELDORF ON THE 21st OF MAY 2019

EnergieAgentur.NRW and Gas- und Wärme-Institut Essen e.V. invite you to join the 6th Workshop “LNG Roadmap – LNG as a driving force for cross-border cooperation within Europe” in Düsseldorf, Germany, on the 21st of May 2019.

The event will highlight the development of liquefied natural gas (LNG) as an alternative fuel for inland and maritime navigation, for heavy-duty commercial vehicles as well as a fuel for industrial applications.

At present many users discuss the reduction of pollutants in the transport sector by using LNG. In 2019 we also expect national and international experts of LNG as fuel gas and transportation fuel to exchange the experiences and have an open discussion about technical and regulatory aspects, safety standards, promotion and sponsorship options and the setup of an infrastructure.

Besides, practical examples and project progresses will be presented.

Date

21.05.2019, 10:00 - 17:30

Organizer

EnergieAgentur.NRW
Gas- und Wärme-Institut Essen e. V.
